

Residential Smart Prepayment Water Meter

This LoRa water meters (NB-IOT, wM-bus optional) can achieve remote wireless meter reading and avoid the trouble of wiring compared with traditional wired water meter.

The water meter complies with international communication protocol, and was designed with advantages of low power consumption, long battery life and easy installation.

- STS compliant
- Remote meter reading and valve control
- Multi-rate setting
- Prepayment and post-payment switchable
- Complies with LoRa / NB-IoT / Wireless M-Bus standards
- Low power consumption, up to 10 years battery life
- Battery replaceable
- Automatic valve derusting periodically.
- IP68
- Complies with ISO4064 standard
- Tampering proof, magnetic attack proof

- 18 months data storage
